**ANNOUNCEMENT: FLIGHT PRO CONNECT ("FPC") TRIP MANAGEMENT TECHNOLOGY IS NOW TABLET READY; AVAILABLE ON THE APP STORE® AND GOOGLE PLAY®.**

Houston, TX – Already champions of comprehensive, concierge trip management solutions, Flight Pro International continues to achieve impressive milestones with their custom secure trip management technology, Flight Pro Connect (FlightProConnect.com, "FPC").

Shortly after passing its second annual Penetration Test ("Pen Test") in August 2023, FPC is now tablet-ready with a custom app platform available immediately for download for all FPI clients. The app can be found on The App Store® and Google Play®, and will be on display in FPI's exhibit space (C11222) at the upcoming NBAA-BACE 2023 convention (Las Vegas, NV). Beta testing for mobile phone is underway and is anticipated to be available in Q1 2024.

FPC users can expect to benefit from multiple convenience features, including:

- Trip Schedules and Daily View
- Services Details with Status Updates
- Crew and Passenger Manifest and Documentation
- Access to Trip Documents
- Trip Alerts for Critical Services and Documents
- Real-Time Communication.

Considering the platform age is still under two years, this rapid development has impressed FPI clients with development speed and unique platform features that address several troublesome variables in similar trip management technologies on the market.

"Most FPI team members have worked in global trip management for 25-30 years *apiece*, and we've seen a litany of technical 'lessons learned' from a variety of operations experiences," states Roberto Cormack, FPI Executive VP, CIO, and leader of the FPC development team.

For this reason, FPC had already become a preferred platform among private aviation operations and crew teams, even before it was available in tablet-ready/app format. Having gleaned troubleshooting feedback and best practice needs from clients during the market research phase, Cormack's team was quickly able to outfit FPC with high levels of "backstop" features most other trip management platforms cannot claim.

FPC assumes a Five-Pillar, premium-quality approach: Cloud-Based Infrastructure, Geo-Redundancy, On-Demand Scalability, Security, and Mobile Optimization. (Further feature descriptions can be found here: <https://flightprointernational.com/flight-pro-connect/>.)

By being Cloud-Based, FPC is freed from typical non-cloud server constraints, such as limited speed flexibility, IT technician availability, on-demand storage capacity (scalability), and lacking nationwide backstops in case of disruptions, all of which are ongoing concerns for platforms tethered to ground-server infrastructures.

Most notably, the FPC's Geo-Redundancy feature ensures the ability to convert the entire platform and immense collection of trip management data from one major US Region to a completely separate US Region, and do so within a single hour. Most users will never be aware of this colossal technical feat behind the scenes.

Albeit not an inexpensive approach, FPI has committed to perform annual Pen Tests, and FPI's partnership with Microsoft further adds to FPC's on-demand resources and security. (Updates to FPI's Pen Test process can be found here: <https://flightprointernational.com/enhancing-flightproconnect-com-fpc-even-further/>.)

The program is provided as an additional value-add to all FPI clientele, and its user-friendliness and ability to withstand large-scale demands and unforeseen disruptions will be most appreciated by private aviation crew and operations teams.

"At the inception of FPC development, our goal has always been to remain customer-centric as the core driver behind the FPC program, even if it appears to be 'overkill' for the average client trip," states Cormack.

**About Flight Pro International**

The Flight Pro International (FPI) mission is to become a 24/7 extension of private aviation flight departments of all sizes. FPI's Global Trip Support (GTS) services provide professional trip planning consultation on important regulatory and international compliance requirements, weather forecasting, travel management, and other essential services for flight operations teams. Through FPI's experienced domestic service providers and reputable global service providers, FPI is able to enhance and facilitate international travel for simple and complex global trips while ensuring a problem-free experience as economically as possible.
